Due to a number of students recently testing positive for COVID-19, the College has made the decision to move to all remote classes for seven days, from Thursday, April 1 through Wednesday, April 7, beginning at 12:20pm today.

During the seven-day quarantine, please note the following:
- Resident students cannot leave campus. Commuter students cannot come to campus.
- Beginning with lunch on April 1, meals for resident students will be grab and go, with no sit-down dining.
- All athletics, clubs and other student life activities are suspended.
- All support services will operate remotely.
- Library services will operate remotely, with enhanced online tutorials and guides, access to expansive digital collections and virtual instructional support. Contact asklis@mitchell.edu or make an appointment in Starfish.
- Students who choose to leave campus at any time during the seven-day quarantine must quarantine for seven days at their chosen off-campus location and not return to campus until they submit a negative COVID-19 PCR test, taken within 72 hours prior to their return. Submit travel form here.

Over the course of the week, conditions on campus will be monitored and evaluated to determine if the quarantine should be extended past April 7.

Mariners, Help Stop the Spread of COVID!
Beginning today, April 1, everybody ages 16+ can receive a free COVID-19 vaccine if you live, work or go to school in Connecticut. Help build “community immunity,” stop the spread of the disease, protect those around you and get back to doing fun stuff safely – like travel, concerts and sporting events.
- Here are the facts about the vaccine.
- Schedule your appointment here.
